PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience in **Full Stack (MERN) Development**, **Frontend Engineering**, and **Backend REST API development**. Skilled in building **scalable, responsive web applications** using **React.js**, **JavaScript (ES6+)**, **HTML**, **CSS**, **Node.js**, **Express.js**, **MongoDB**, and **Mongoose**, with strong understanding of API design and integration. Possesses a solid foundation in **Data Structures and Algorithms**, **Object-Oriented Programming (OOPS)**, **DBMS**, **Operating Systems**, and **Computer Networks**. Solved **450+ LeetCode problems** with active competitive programming participation (**LeetCode Rating: 1560**, **CodeChef: 2★**). Experienced with **Git/GitHub** for version control and collaborative development. Seeking **Software Engineer / Full Stack / Frontend / Backend Developer** roles to contribute to high-impact, scalable systems..

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript

Web Technologies: HTML5, CSS3, SCSS, JavaScript (ES6+)

Frontend Frameworks & Libraries: React.js, Tailwind CSS

Backend & APIs: Node.js, Express.js, RESTful APIs, API Integration

Databases: MongoDB, Mongoose(ODM), SQL (Basic understanding)

Developer Tools & Platforms: Git, GitHub, VS Code, Postman

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming (OOPS), DBMS, Operating Systems, Computer Networks

PROJECTS

Cinetale | React.js, JavaScript, HTML5, TailwindCSS

- Developed a **scalable**, component-based frontend application using **React.js** following modern UI/UX practices.
- Implemented **client-side routing** and **dynamic navigation** using React Router DOM.
- Built **fully responsive layouts** ensuring cross-device compatibility (mobile, tablet, desktop).
- Followed clean code and modular design principles, improving **maintainability** and **scalability**.
- Live Project: <https://cinetale.netlify.app/>

QuickShow – MERN Movie Ticket Booking Platform

Tech: MongoDB, Express.js, React.js, Node.js, JavaScript, REST APIs, Mongoose

- Built a **full-stack MERN movie ticket booking platform** with movie browsing, seat selection, booking, and payment workflow.
- Implemented **role-based authentication (User/Admin)**, protected routes, and booking management.
- Designed **real-time seat availability logic** to prevent double booking and ensure data consistency.
- Developed **scalable RESTful APIs** using **Node.js**, **Express.js**, and **MongoDB (Mongoose)**.
- Built a **responsive React.js frontend** and managed version control using **Git/GitHub**.

PRACTICAL EXPERIENCE

- Gained hands-on experience building **full-stack MERN applications**, focusing on **React.js component design**, **reusability**, **performance optimization**, and **responsive layouts**.
- Implemented and consumed **RESTful APIs** using **Node.js** and **Express.js**, along with **state management**, **routing**, and **authentication workflows**.
- Worked with **MongoDB** and **Mongoose** for data modeling and backend integration in real-world application scenarios.
- Regularly practiced **Data Structures and Algorithms** to strengthen problem-solving skills and improve coding efficiency.

ACHIEVEMENTS

- Solved **450+ Data Structures and Algorithms** problems on LeetCode and **150+** problems on GeeksforGeeks
- LeetCode Rating: **1560** | CodeChef: **2★** (Max Rating: **1441**)
- Ranked **47,380** in JEE Main 2024

EDUCATION

RELEVANT COURSES

- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems (DBMS)
- Operating Systems
- Computer Networks

B.Tech in Information Technology | SGSITS Indore

2024 – 2028 | CGPA: 7.70
